

# Office Telephony System (PBX)

## Can you afford to lose a business call?

Do you know how to maximise the efficiency of your telephone lines?

Do you find it difficult to manage your telephone lines, or perhaps are they in a complete mess?

- Then we have the solution for you.
- We can supply and install a complete new generation of PBX (Private Branch Exchange) system and telephone handsets in a few hours. With our state of the art PBX system, you will get many features that do NOT come with ordinary PBX which some other companies offer. Some of the main features are:
  - Call Distribution among internal extensions
  - Call waiting
  - Music on hold
  - **Auto attendant with built in operator**
  - Voice mail for each extension with individual greeting
  - Call diversion
  - Call transfer
  - **Direct incoming call to any extension**
  - Do not disturb

Only with our new generation PBX system, it is possible to benefit more by integrating it with the internet for FREE to utilise these features. To find out more, please see next page...

# Internet Telephony System (IPPBX)

Nowadays, there is a trend to use the internet in all aspects of life, in particular telephony systems.

Despite ordinary **PBX**, our new generation **PBX** can be seamlessly integrated with the internet giving a much more flexible approach towards usability, friendliness and resilience of your telephone system. This integration can be done for **FREE** without the need for extra equipment or cost.

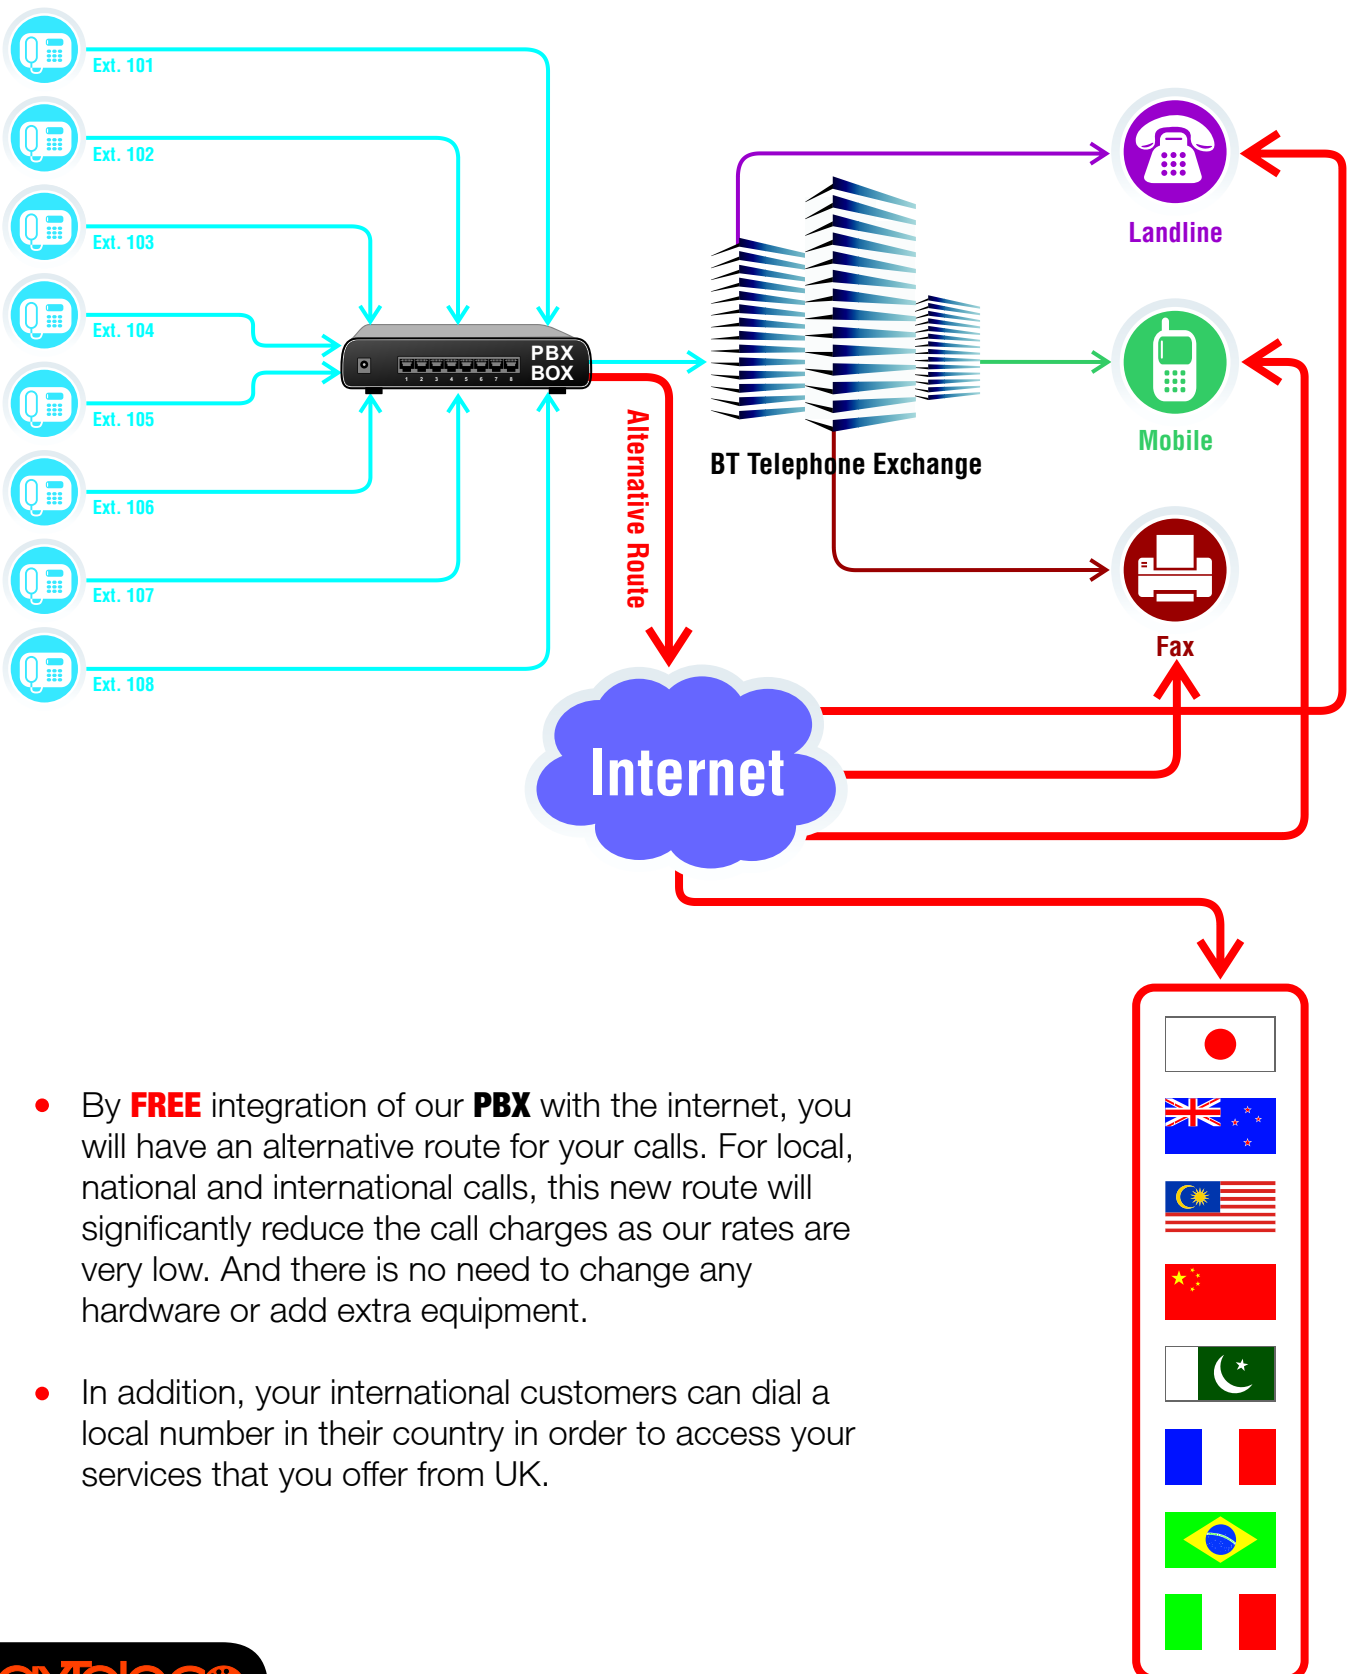

- **Some of the extra features are:**

- Low cost calls
- Call management system
- Worldwide local number connected to your office direct (DID)
- Online monitoring of call charges
- Voicemail to email
- Follow me
- Free calls (subject to conditions)

Our solution can be fitted into any type or size business. Home workers, small business, medium size business or indeed large enterprises can all enjoy the full benefit of our solution. Table below depicts our solution for different size businesses.

Package	Part No.	Telephone Lines	Extentions
Small Office	IPX-200-2	2	8
Mid Size Biz	IPX-600-6	6	32
Enterprise Biz	IPX-1000-16	16	64

# How Does It Work?

- By **FREE** integration of our **PBX** with the internet, you will have an alternative route for your calls. For local, national and international calls, this new route will significantly reduce the call charges as our rates are very low. And there is no need to change any hardware or add extra equipment.
- In addition, your international customers can dial a local number in their country in order to access your services that you offer from UK.

# What Will It Cost?

We believe our solution is by far the most cost effective solution of its kind, considering the range of facilities that it provides. Tables below give an indication of the cost of hardware needed as well as some of the call charges to mobile and international numbers. The cost of hardware could vary for each project depending on the location of the customer, size of business and other factors.

Solution	Part No.	Main Box	Handset IF73	Handset 531	Handset 551	Installation
Small Office	IPX-200-2	499	95	115	150	FREE*
Mid Size Biz	IPX-600-6	1199	95	115	150	FREE*
Enterprise Biz	IPX-1000-16	1499	95	115	150	Call
